# Industrial Hygiene

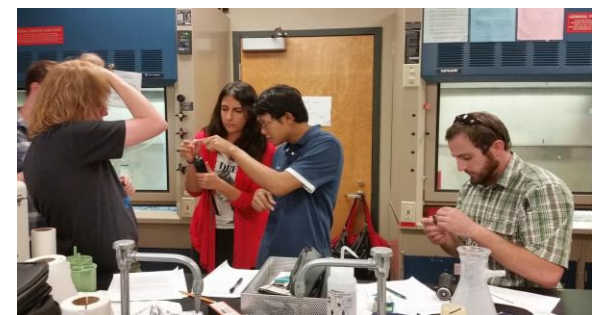

Considerable portion of our day is in the workplace. Ensuring that workplaces are safe and health is important to the well-being of everyone. Let us have fun to learn what exist in the workplace, what the OSHA regulation is and how to control these risk factors such as ergonomic stressors.

IH students are learning how to correct the volume of personal air sampler.

IH students are visiting Caterpillar Athens GA.

IH student, Yasmin and Fauzan, are measuring the air concentration. Jasmin found her favorite Job as Industrial Hygienist in Caterpillar.

## Student Comments from previous class

- *"I enjoyed learning about industrial hygiene because it is so important to my major and future job."*
- *"It made me more aware of the hazards and the legal aspects of the work environment. Dr. Yu became one of my favorite professors. He really liked what he was talking about and I will know about 1-BP forever!"*
- *"Dr. Yu is my new favorite professor! He was always willing to meet with students, built a strong rapport with us, and knew the information extremely well."*
- *"Some of the best life advice I've ever received from a professor"*
- *"I think I want to pursue industrial hygiene professionally because of this course"*
- *I learned about the significance of the workplace on health -- it's a place where many spend most of the day with specific exposures and tasks. I will likely work in an occupational health setting in the future."*
- *"It was really cool to tour the Caterpillar plant and learn about real life industrial hygiene situations."*

Lecture Time: Monday 11:15-12:05 PM Wednesday  
11:15-13:05 PM For more details, please contact
